

Introduction to SPARQL

What you'll learn:

SPARQL is a language to formulate questions (queries) for knowledge databases.

You will learn the basic syntax and practice writing SPARQL queries.

Prerequisites:

Prior experience with a query language (such as SQL) is a plus, but not required.

SPARQL Endpoint:

For this introduction to SPARQL, we will be using the Wikidata SPARQL endpoint: <https://query.wikidata.org/>

Tutorial:

Please see the following link for the tutorial content. It uses the SPARQL endpoint mentioned above.

https://www.wikidata.org/wiki/Wikidata:SPARQL_tutorial

SPARQL Quick Reference
